Mahina Token

Disrupting the Financial Services Industry

INTRODUCTION

MAHINA TOKEN

Are you ready to be a part of a ground breaking project aimed at disrupting the financial services industry? Introducing Mahina Token, a unique BEP-20 token designed to support the growth and elevation of qualified women financial advisors through event marketing. As a result of our strategic partnership with Akamai Advisors, we can identify and sponsor deserving advisors. Token utility revenue is generated as a result of the marketing campaigns deployed.

Target Market: Individuals that have financial planning and insurance needs.

Abstract

About twelve years ago, a pseudonymous cryptographer known as Satoshi Nakamoto introduced Bitcoin as a digital analog to gold: Limited in supply, but secured by modern cryptography, and made for the internet age. Following Satoshi's footsteps, many tried to improve on Satoshi's original vision, and thousands of alternative cryptocurrencies were born. Despite significant recent developments and innovation, the market for cryptocurrencies remains very niche. Cryptocurrencies still have shortcomings that discourage mainstream use, in particular high volatility, and barriers to entry. It's also worth noting that existing cryptocurrencies have not been designed with a lot of new features.

Introduction

Are you ready to be a part of a groundbreaking project aimed at disrupting the financial services industry? Introducing Mahina Token, a unique BEP-20 token designed to support the growth and elevation of qualified women financial advisors through event marketing. As a result of our strategic partnership with Akamai Advisors, we can identify and sponsor deserving advisors. Token utility revenue is generated as a result of the marketing campaigns deployed.

Target Market: Individuals that have financial planning and insurance needs.

The Problem

Men outnumber women in the financial services industry 3 to 1. Women earn on average 81 cents for every dollar earned by a male counterpart. The biggest challenge for any advisor is getting in front of prospective clients. Too many advisors spend money on marketing campaigns that fail to deliver qualified leads.

Furthermore, in an agency environment, corporate resources are often focused on the newer agents. Lastly, too many agents push products with a transactional approach. To make matters worse, they have a narrow product focus due to personal bias, lack of knowledge or limited access to carriers.

Our Solution: Mahina Token

Mahina Token addresses these issues by providing a comprehensive tokenomic model that supports and enhances the efforts of Akamai Advisors to deliver focused training and lead support to seasoned women advisors looking to level up their practice. Through a series of strategic initiatives, Mahina Token aims to expand the reach of seminar/event marketing, reduce lead costs, and improve the return on investment for advisors. Akamai Advisor's take a holistic approach with a focus on relationship building. This allows our advisors to understand not only the numbers but the money psychology of the client, which ultimately drives their financial decisions.

The Competitive Advantage

Our ability to deliver quality leads at a much lower price point. Activity equals Success! Our systems allow for higher conversion rates, along with an increase in the size and scope of cases. Our approach makes for a unique client experience, distinguishing our advisors in the marketplace.

Holder Privileges

Access to live educational events.

First in line access to future NFT initiative

Holder's domiciled in the US will have access to complimentary / discounted financial reports.

- Subject to advisor availability
- Requests will be prioritized by size of token holding.

Key Features of The Mahina Token

Diversified Rewards

3% of the trading fees is reflected back to Mahina Token holders in the form of BBTF. BBTF reflects the following tokens: Safemoon, BNB – MirrorProtocol, The MirrorProtocol, Glow Token, MetaBUSD, EverReflect, & Reflecto Coin. These tokens in turn reflect additional Safemoon and BBTF, along with BUSD, XRP, RUSD, Binance-Pegged – BTC, ETH, BNB, XRP, ADA, MATIC, LINK. Staking the MirrorProtocol tokens in their global staking pool gives our holders access to even additional diversification and rewards for holding.

1% of the trading fees is reflected back to Mahina Token holders in the form of additional Mahina tokens. This bolsters your position in the Mahina Token in addition to accelerating the percentage of BBTF reflected tokens you receive.

Flex Rewards Pool

The flex rewards pool is initially comprised of 17% of the total supply (1.7 billion Mahina Tokens). The reflections generated will accumulate not only more Mahina Token, but more importantly a supply of BBTF Tokens. The reflections off the BBTF Tokens will be eligible for liquidation for the purpose of funding the Mahina Token liquidity pool and/or the utility efforts. Over time this flex pool will soak up more circulating supply of both Mahina Token and BBTF, essentially acting as a de facto burn wallet for both projects.

Liquidity Injection Protocol

Powered by BlockBustersTech, a 2% fee allocation ensures liquidity is consistently injected into the token, providing holders with liquid assets for conversions and less price volatility.

Why Mahina is a BEP-20 Token?

The invention of Ethereum was revolutionary to the blockchain ecosystem as a whole, as for the first time ever people gained a way to launch their own tokens and smart contracts. For years, the Ethereum network was the default place for launching innovative blockchain-based projects.

However, the increasing popularity of cryptocurrencies, and the advent of decentralized finance (DeFi) solutions specifically, has caused massive problems with the efficiency of the Ethereum blockchain.

The transaction times and fees on the Ethereum network have become so high that many crypto enthusiasts stopped using ETH altogether, and blockchain developers started to look for a better alternative. That's what led to the creation of Binance Smart Chain.

What is Binance Smart Chain?

Binance Smart Chain (BSC) is a high-end blockchain infrastructure created by Binance, one of the world leaders in providing blockchain solutions. Binance Smart Chain was designed to fulfill the same purposes as Ethereum - the ability to launch tokens, smart contracts and decentralized applications - but with a much better efficiency.

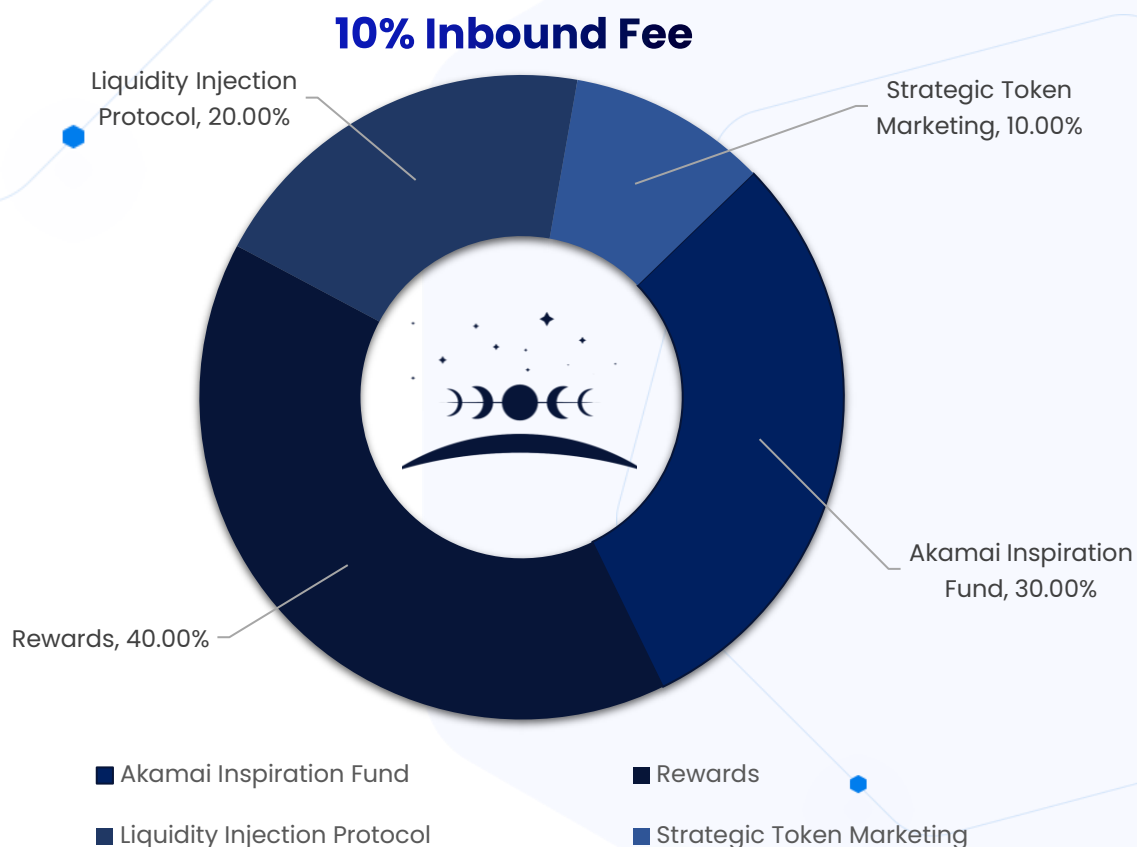

While the Ethereum network uses a token format called ERC-20, the BSC blockchain has its original, innovative token format: BEP-20. Tokens utilizing the BEP-20 format can be purchased, sold and transferred with the fees that can be 30-100x lower compared to Ethereum fees.

Not only the fees, but also the transaction times of Binance Smart Chain are much lower than Ethereum's. Overall, BSC is simply a much more effective solution than ETH. Since Mahina Token is an ecologically-oriented project, choosing the more energy-efficient solution was the obvious choice to make.

Tokenomics

Inbound Fee: 10%

- **Akamai Inspiration Fund: 3%**
 - A volume-based fund
 - Supports marketing campaigns to expand the reach of seminars/events.
 - Fuels lead generation campaigns
 - Covers other costs associated with corporate activities.
- **Rewards: 4%**
 - 3% BBTF (participates in compounding rewards and auto diversification)
 - 1% Mahina Token (increases reward weight of holder's bag over time)
- **Liquidity Injection Protocol: 2%**
 - Strategically injects liquidity into the token for conversions.
- **Strategic Token Marketing: 1%**
 - A volume-based fund collecting BNB
 - Supports marketing campaigns to drive Mahina Token adoption.

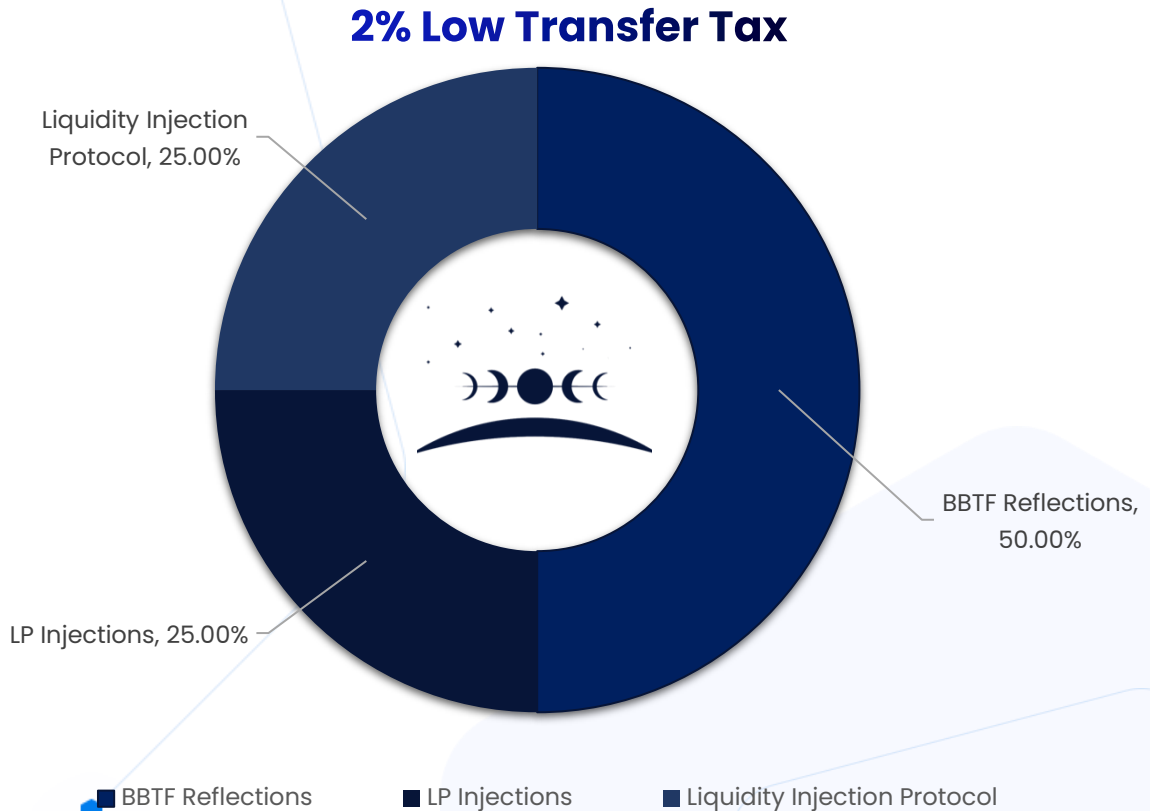

Outbound Fee: 10%

- **Akamai Inspiration Fund: 3%**
 - A volume-based fund
 - Supports marketing campaigns to expand the reach of seminars/events.
 - Fuels lead generation campaigns
 - Covers other costs associated with corporate activities
- **Rewards: 4%**
 - 3% BBTF (participates in compounding rewards and auto diversification)
 - 1% Mahina Token (increases reward weight of holder's bag over time)
- **Liquidity Injection Protocol: 2%**
 - Strategically injects liquidity into the token for conversions and stability.
- **Strategic Token Marketing: 1%**
 - A volume-based fund
 - Supports marketing campaigns to drive Mahina Token adoption.

Low Transfer Tax: 2%

- 0.5% LP Injections
- 0.5% Akamai Inspiration Fund
- 1% BBTF reflections

The Impact

By acquiring the Mahina Token, you'll not only support the growth and expansion of the Akamai Inspiration Fund but also benefit from a well-balanced tokenomic model designed for long-term growth and stability. Your acquisition of the Mahina Token will contribute to the ongoing development of the project, empowering countless individuals with access to life-changing information and financial planning assistance. These seminars, in turn, will enhance the performance of the Akamai Advisors Group, creating a positive feedback loop where the group's success feeds back into the token itself. This revenue generating mechanism ensures a sustainable and mutually beneficial ecosystem for both the Mahina token holders and the Akamai Advisors Group.

Powered by BlockBustersTech

BlockBustersTech is a DeFi software development company and a strategic partner to the Mahina Token. The goal of BlockBustersTech is to transition traditional web 2.0 companies into web 3.0 cryptographic-capable companies through tokenization in order to amplify their ability to function in a new technological paradigm. The BlockBustersTech token is BBTF and is the primary rewards token reflected by Mahina. BBTF delivers an auto diversification element to our holders and the ability to participate in the BlockBustersTech ecosystem.

Conclusion

Don't miss this unique opportunity to be a part of Mahina Token, a revolutionary project poised to reshape the makeup of the financial services industry. By acquiring the Mahina Token today, you can enjoy diverse rewards, access to discounted services, and the satisfaction of contributing to a project with a far-reaching positive impact. Join us now and be a part of the Mahina Token journey!
